\$15 – towards simulator for 9 holes | \$9 – towards skins (\$1 towards each hole) | \$1 – towards “Hole-in-one” pot

## Our Skins Tournament format

Golfers play to win individual holes or “skins” in a match play format. Each hole is assigned a monetary value and the golfer who won the hole with the best score outright won the money for that hole. In the event that two or more golfers tie on a hole, the skins carried over to the next hole. As long as the two best scores tie, all players tie and have the chance to win the next hole. Skins will be carried over indefinitely to the next hole and onto the following week until one single player wins a hole outright.

## Example

10 registered players; each hole is valued at \$10 for a total of \$90 for 9 holes. First hole is worth \$10, the two best scores on the first hole score a par. The pot carries over because no player has won the hole outright. Hole 2 is worth \$20, all 10 players have the same chance to win the pot. On hole 2, the best score is 1 under par (birdie) scored by one player. The player with the birdie wins the pot of \$20. Hole 3 is worth \$10 because there is no carry over. No player wins a hole outright after playing the 9<sup>th</sup> hole. The pot is carried over to the following Monday. The first hole is worth \$70 plus an additional \$1 for each player registered for the tournament that day.
